

TESTS

Use `Visual Studio`

Download `SpecFlow`

Run tests

1. Via Test Explorer
2. Download project files in one folder. Enter `cmd` in the address bar of the folder where all the necessary files are located. In the terminal window that appears, enter `dotnet test`.

Folders in project

1. `Page Objects` folder contains classes, implementation of the PageObject pattern
2. `Features` folder contains feature files with scenarios and their implementation in code.

Allure

In `PowerShell` terminal enter `allure serve "PATH"`, where `PATH` is the path to the project folder named `Allure Results`. Then you will see test report in the project folder named `Allure Reports`.
